

MEMORANDUM FOR: Mr. Colby

STAT  
This is in part a solicited endorsement. Bill Morrell wants his own unit in Treasury to takeover [ ] function, as well as economic intelligence support to Top People generally. OER ~~was~~ obviously objects (as do I -- Morrell's employees are even further from accepting the concept of objective intelligence analysis than those of other policy making & pushing departments). Shultz liked [ ] service, we hope Simon will, and Dent agreed to write this letter to put on record his own desire that it be continued.

STAT  
[ ] is overdue for return to OER, and wants to come back, but has agreed to stay on until we find a replacement who can do the job well enough to fend off Morrell's campaign.
